WORK EXPERIENCE

Maroon Moshaver Arjan
Front-End Developer   Azar 1402 - Ordibehesht 1404

The website on which I collaborated with this team was a cryptocurrency trading platform, and I held the responsibility for the application logic. This encompassed managing all routing, API calls, authorization processes, as well as real-time functionalities such as web sockets or Pusher events, among other features.
. Routing, API, Web Socket, State Management(Redux & Context), Performance Optimization

Sharen
Front-End Developer   Ordibehesht 1404 - Current

Developed a real-time monitoring and reporting web application for a VOIP system.
The app includes dashboard pages for monitoring queues, extensions, agents, and call activity—all updated in real time via WebSockets. It also features report pages with extensive tables and charts for statistical analysis. I designed the UI and built the software from scratch.
. React 19, TanStack Virtual, TanStack Query, Zustand, WebSocket, Shadcn UI, Multilanguage support.
